

TO IMPROVE YOUR WATER SYSTEM TANK BUSINESS, YOU'VE GOT TO HAVE THE RIGHT CONNECTION.

[**H2 PRO SS, NOW WITH A STAINLESS STEEL WATER CONNECTION**]

©2006 Flexcon Industries

16 gauge solid steel tank, finished with highest quality urethane paint.

Water chamber is independent of tank walls, allowing diaphragms to be sized properly for each tank.

Steel clench ring regulates movement and prevents diaphragm from rubbing against tank wall.

Condensation reducing design virtually eliminates external corrosion.

Patented, welded all stainless steel water connection has separate air and water seals.

Engineered with the contractor in mind, the improved Flexcon H2Pro SS now comes standard with a stainless steel water connection. It's the only well water tank in this category that offers CAD technology (Flexcon's famous controlled action diaphragm system) combined with a stainless steel water connection. The result is superior air and water separation and unmatched performance.

CONTROLLED ACTION DIAPHRAGM MAXIMIZES DRAWDOWN & ELIMINATES CHAFING

Our patented manufacturing technique allows Flexcon to properly size the diaphragm in a full range of sizes from 14 to 119 gallons. Every tank undergoes a seam-weld test, high pressure test, and is subjected to our famous helium test. Before leaving the factory, a final air charge check insures each tank arrives at the job site with the correct air charge.

Flexcon stands behind every H2Pro SS tank with a five-year warranty. Just what you would expect from Flexcon: quality and performance guaranteed.
