

# REGARDLESS OF WATER HEATER SIZE, WHV EXPANSION TANKS KEEP THE HOT WATER IN THE TANK AND OFF THE FLOOR.

## [ WHV, THE ULTIMATE POTABLE WATER EXPANSION TANK ]

16-gauge solid steel tank, finished with highest quality urethane paint to stand up to the dampest basement or crawl space.

Pressure tested and backed with a 5-year limited warranty.

Condensation-reducing design virtually eliminates external corrosion.

Steel clench ring regulates movement and prevents diaphragm from rubbing against tank wall.

Patented CAD-2 technology: strong 100% butyl diaphragm and copolymer polypropylene lower water chamber for maximum water and air separation.

WHV

CAD-2

If you're looking for the ultimate in hot water pressure protection, look no further. FLEX 2 PRO WHV with exclusive CAD-2 diaphragm is it.

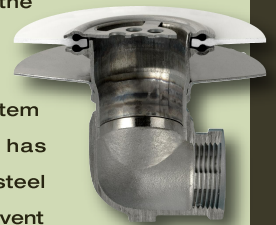

WHV potable water expansion tanks are designed to maintain safe pressure in domestic water systems that utilize a back flow preventer or check valve.

The tanks feature a 100% butyl diaphragm combined with a copolymer lower water chamber for maximum water and air separation. There's no better way to separate the system water from the tank's air precharge.

The system connection has a stainless steel elbow to prevent corrosion. And, the tanks are finished with appliance-quality paint which helps prevent external corrosion.

On top of all this, every WHV tank is comprehensively tested and backed by Flexcon's 5-year limited warranty.

WHV tanks, guaranteed to keep you out of hot water with your customers.
