

**You can't judge a composite tank by its cover.
Make sure its got CAD-2 technology inside.**

H2PRO LITE COMPOSITE WITH CAD-2 DIAPHRAGM.

H2PRO LITE composite represents the latest technology in light weight composite well tanks. Featuring Flexcon Industry's patented CAD-2, diaphragm design inside, it can't be beat! If your customers are looking for the ultimate

lite weight, bullet proof well tank, go with proven Flexcon performance and durability, install the state of the art H2PRO LITE!

Precision injection molded domes for uniform wall thickness and consistently engineered dome profiles.

High tech spin welding process permanently fuses precision injection molded domes to the extruded cylinder.

Reinforced with durable, continuous strand fiberglass and sealed from the environment with weather resistant epoxy resin. Suitable for underground installation.

SUPER SIZED
OUR LARGER TANK SIZES OFFER GREATER DRAWDOWN CAPACITY.

CAD-2

CAD-2 diaphragm technology: strong, 100% butyl diaphragm and copolymer polypropylene lower water chamber for maximum water and air separation.

Rugged base engineered to withstand maximum loads and extreme environmental conditions.

Tough, injection molded, rigid PVC connection for easy installation and lifetime performance.

H2PL SERIES

Composite

MATERIALS OF CONSTRUCTION

- **Top and bottom domes:** Injection molded copolymer polypropylene
- **Shell:** Extruded copolymer polypropylene
- **Outer shell:** Fiberglass-wound, coated with epoxy resin
- **Water chambers:** Top diaphragm is 100% butyl rubber, lower water chamber is anti-microbial, copolymer polypropylene
- **Base:** Copolymer polypropylene
- **Connection:** Rigid schedule 80 PVC
- **Air valve:** Easy to access brass valve with o-ring seal
- **Testing:** High pressure, seam weld, helium, final precharge check
- **Warranty:** 5 year limited

COMPOSITE TANK DIMENSIONS

Model	Total Tank Volume		A Height		B Floor to CL		C Diameter		D CL to fitting end		E	Total Weight Connection	
	gal	liters	in	cm	in	cm	in	cm	in	cm		lbs	kilo
